CASES

LOCKDOWN

MAKING SURE YOUR EQUIPMENT ARRIVES IN ONE PIECE AND FULLY FUNCTIONAL MEANS YOU CAN'T CUT CORNERS WHEN SELECTING THE RIGHT CONTAINER.

The Extreme Lockdown range of aluminium containers are made from a special high-tensile aluminium alloy providing a lightweight product with a natural resistance to impact. As is the Extreme way, we like to keep it flexible with the Lockdown product, whether you want standard Euro pallet sizes or something custom...its your call.

OVERVIEW

- High strength aluminium alloy offering optimal tensile and shear strength
- Positive location covers
- Effective protected latch with safety catch and padlock facility
- Positive stacking features
- Large range of standard colours
- Range of finishes
- Standard pallet or custom sizes

THE RANGE

FORCE 12

FACT:

We've tried to crush it, drown it and choke it without success! It even withstood an 11T static load!

Finishes

Available Finishes:

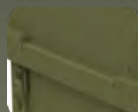

Alocrom pre-treatment, powder coat (inc IRR) or wet paint (inc CARC) finish

Specification

Mil-Std 810F, NATO AEPP-1, AEPP-3

Extra large heavy duty carry handles (suitable for arctic mitts)

Positive 'storm level' stacking feature

Protected self-locking sprung latches (padlockable)

Unique 'crumple zone' protection

Mil-Spec pressure relief valve and humidity indicator

Positive fit lid with IP65 seal

FORCE 10

FACT:

Walls covered with our unique force protection coating can withstand explosions up to 20 times greater than a normal, uncoated wall.

Finishes

Co-polymer protective coating

Specification

IP66

Large bail carry handles

Positive self locating stacking feature

Protected self-locking sprung latches (padlockable)

2-way pressure relief valve

Force protection coating

Positive fit lid with watertight seal

FORCE 6

Large bail carry handles

Positive 'self locating' stacking feature

Protected self-locking sprung latches (padlockable)

2-way pressure relief valve

Pre-treated bare metal finish as standard. Paint finish optional

Positive fit lid with watertight seal

FACT:

The lockdown force>6 is over 30% lighter than an equivalent size rotationally moulded plastic case.

Finishes

Paint and special finishes are an optional extra.

Specification

IP54

APPLICATIONS

Application	Situational awareness, security and surveillance equipment for Naval application
Product:	Lockdown Force>12
Special features	Large size 1800mm x 800mm x 800mm Engineered protective foam internals Custom paint finish and logo
Application	NEC Multisync P461 monitor container
Product:	Lockdown Force>12
Special features	1200mm x 800mm Euro pallet size Engineered protective foam internals
Application	Security equipment
Product:	Lockdown Force>6
Special features	Lightweight container with internal anti vibration mounted panel
Application	Cable containers for German Army
Product:	Lockdown Force>12
Special features	Mil-Std 810F... NATO AEPP-1... AEPP-3. Tested containers with foam linings

SPECIFICATIONS

The Extreme Lockdown Force>12 Container is tested & certificated to the following elements of Mil-Std 810F, NATO AEPP-1, AEPP-3

Vibration 	Drop Test (freefall) 1m on to all faces 	Stacking Test 
Structural (over/under pressure) 	Corrosion 	
	Handle loading Tested to 1500N (153kg) 	
For detailed information on all tests please contact the office		

OPTIONS

- Custom foam internals
- Document/tool pockets and pouches
- Fixed and movable divider options
- Recessed latches
- Hinged lid (note; may effect sealing levels)
- TSA approved latches
- Desiccant
- Lifting eyes
- Forklift skids
- Castors and dollies
- Large range of standard colours
- Range of finishes
- Labelling
