

As the market increasingly demands smaller lighter products reflected in the growth of 19"/2 electronics, we've taken a look at how the Extreme range can adapt to meet this with a range of custom bags. Lightweight and portable, yet offering protection from shock, vibration and the environment we think we've cracked it with the X Pack range of shock mounted backpacks.

A shock mounted unit in a rigid housing wrapped in a ballistic nylon 'skin', the Ballistic range gives the benefits of rigid protective case in a portable format.

#### SPECIFICATION:

- LIGHTWEIGHT ALUMINIUM INNER ELECTRONICS HOUSING
